PROFESSIONAL SUMMARY

Backend engineer with 3+ years of experience building and operating Java and Spring Boot services. Strong in architecture improvement, incident response, and system automation for production backend systems. Improved deployment reliability from 5% failure to 0%, reduced incident analysis lead time from 40 minutes to 12 minutes, and delivered stable services with MySQL and Redis in enterprise environments.

CORE COMPETENCIES

- Java
- Spring Boot
- MySQL
- Redis
- Backend Architecture
- Incident Response
- CI/CD
- System Automation

WORK EXPERIENCE

NCELL - DataForge 2026.01 - Present

Backend Engineer | Java, Spring Boot, Redis, Elasticsearch, MySQL

- Developed backend services and improved reliability with automatic fallback from Elasticsearch to DB under failure conditions.
- Designed stateless authentication using JWT and Redis with consistent token revocation handling.

NCELL - SMIP 2025.01 - 2025.12

Backend Engineer | Java, Spring Boot, JUnit5, Mockito

- Standardized API exception handling and validation flow across services.
- Reduced incident analysis lead time from 40 minutes to 12 minutes and recurring errors by 30%.

Hecto - KMS 2023.10 - 2024.07

Backend Engineer | Java, Spring Boot, Docker, GitLab CI/CD

- Built automated build and deployment pipelines for backend services.
- Reduced release lead time from 1 hour to 25 minutes and deployment failure rate from 5% to 0%.

SKILLS

Backend: Java, Spring Boot, REST API **Data:** MySQL, Postgres, Redis, Elasticsearch **Operations:** Linux, Docker, GitLab CI/CD, Airflow
Testing: JUnit5, Mockito
